HK945-25K	Anti-Rabbit One Step Poly HRP, 25ml Pack

For Laboratory Use Only

REAGENT SUPPLIED:  
(Store at 2-8°C)

1 vial (6ml) of ready-to-use Anti-Rabbit One Step Poly HRP-HK945-06K. Use upto 100ul/slide.

1 vial (25ml) of ready-to-use Anti-Rabbit One Step Poly HRP-HK945-25K. Use upto 100ul/slide.

#### METHOD OF USE

1. BioGenex ready to use Anti-Rabbit One Step Poly-HRP Reagent have been optimized for use with BioGenex rabbit IgG antibodies. It can be used with third party antibodies.
2. After application of the primary antibody, rinse tissue section slides with wash buffer three times. Drain and blot gently .
3. Place enough drops of Anti-Rabbit One Step Poly-HRP (HK945) to cover the section and incubate for 30 minutes at room temperature. Drain and blot gently.
4. Rinse slides with wash buffer. Transfer to a bath of wash buffer and incubate for 5 min. Drain and blot gently.
5. Repeat step 4 once more.
6. Sections are now ready for application of a suitable enzyme substrate (AEC or DAB).

Note: Refer to your BioGenex Automated Stainer operator's manual for use of these products in automated procedures. If you are using BioGenex DAB chromogen kit then use 40ul or 1 drops of DAB chromogen in 1 ml of DAB buffer.
